

Alon Ascoli received a Ph.D. Degree in Electronic Engineering from University College Dublin in 2006. Since 2012 he is a Lecturer at the Faculty of Electrical and Computer Engineering, Technische Universität Dresden. He develops system-theoretic methods for the analysis and design of bio-inspired memristive circuits. He was honoured with Best Paper Awards from IJCTA in 2007 and MOCASST in 2020. In April 2017 he was conferred the habilitation title as Associate Professor in Electrical Circuit Theory from the Italian Ministry of Education. He is currently the President of the IEEE Cellular Nonlinear Networks and Memristive Array Computing (CNN-MAC) Technical Committee.
